WHO IS ALBA

Alba is an international technology leader in creating individual technologies and offers additional processes in the production chain of manufacturing high-quality components.

WHY ALBA

- Individual systems according to customer requirements
- Mobile and stationary tool carriers
- Operated manually or automatically
- Electrical, pneumatic, or hydraulic driven
- Integration in automated production lines possible
- Equipment relocation between production plants
- Increase cost efficiency by refurbishing existing equipment of lines

Alba develops universal tool carrier systems for polyurethane foam processing or tool carrier systems specially adapted to the process. Depending on the required motion sequences, tool weights, closing times, and locking forces, we manufacture manual-, pneumatic-, hydraulic, or electric-driven systems.

As a partner of renowned production companies, Alba has many years of experience and a range of designs available for any use case in tool carrier construction which meet the highest standards regarding precision, quality, and scheduling.

BENEFITS OF ALBA TOOL CARRIERS

- Construction and design according to individual customer requirements
- Ergonomic design
- Cost-effective solution
- Flexibility for different product variants
- Tool quick-change system possible
- Simple and fast relocation options

AREAS OF APPLICATION

- Mobility Industry
- Acoustic Applications
- Medical Fields
- Furniture Industry
- Civil Engineering Applications

ALBA ADVANTANGE

A combination of decades of experience and attained know-how, a high degree of vertical manufacturing integration, gives us the control to maintain high quality throughout all manufacturing phases and the opportunity to manufacture rapidly.

WHAT DO WE OFFER

- Functional and efficient design
- Manually operated or automated tool carriers
- Butterfly or crocodile closing systems
- Pneumatic, hydraulic or electric driven-systems
- Integration into automatic production lines See rotary table brochure
- Certifications: EN ISO 13849, EN ISO 13857, EN ISO 141221
