ALBA AND SIEBENWURST ENTER INTO COOPERATION AND EXPAND GLOBAL BUSINESS FIELDS

We are pleased to have gained another strong cooperation partner in Siebenwurst.

On September 20, 2021, Christian and Roland Siebenwurst - Managing Directors of Siebenwurst - signed the cooperation agreement with CEO Anton Naue.

In the future, the companies Alba Industries and Siebenwurst will cooperate more closely in order to offer common customers a larger and more comprehensive range of services. The core technologies in the foam, punching, and surface areas will be expanded and supplemented by additional competences. Joint distribution in the USA and Mexico is also an important step towards meeting global requirements and making the best possible use of shared resources.

The aim of the cooperation is to further establish the company as a strong partner and supplier on the global market and to expand its market position. Furthermore, thanks to the jointly expanded portfolio, the cooperation can quickly realize prototype parts and, if required, the production of small series with the existing technologies "injection molding, foam, surface, and punching".
