

CREATING INDIVIDUAL TECHNOLOGIES

**YOUR PARTNER FOR INNOVATIVE
TECHNOLOGIES**

**FUNCTIONAL LAMINATED
WOOD/NATURAL FIBER
PRESSED COMPONENTS**

www.albatools.com

Alba is an internationally active technology provider and reliable partner in the development of challenging projects. From planning to implementation, Alba offers competent solutions. Alba develops innovative systems for all customer requirements.

APPLICATION AREAS

- | **Automotive industry (passenger cars)**
- | **Commercial vehicles**
- | **Furniture industry**
- | **Leisure industry**

USP'S

- | **Interesting price/performance ratio also for small batches**
- | **Concept with favorable tooling costs and flexible trimming**
- | **Utilization of renewable raw materials**
- | **Production of components with good mechanical properties at low weight (component density adjustable via grammage)**

Thanks to our many years of know-how and our high in-house production density, we can manufacture initial prototype tools at extremely short notice.

FUNCTIONAL COMPONENTS MADE FROM RENEWABLE RAW MATERIALS

As a partner of renowned OEM and Tier-I suppliers, we have many years of experience producing components from renewable raw materials and meet the highest standards regarding precision, quality, and adherence to delivery dates. The ecological idea is always in the foreground.

BENEFITS

- | Economical production processes
- | Technical support for component design
- | Multiple utilisation of pressing tools through flexible trimming of the outer component geometries
- | Combination with PUR foam and various decorative surfaces possible if required

PRODUCT PORTFOLIO

- | Pressed components
- | Leather or foil laminated components
- | Foamed components
- | Connection of standard fasteners or injection-moulded retainers via adhesive joints if required
